

# Wild Boar, Rana Amurensis, Apis Cerana and Other Species Should Go Through Scientifically Evaluation and Be Kept in the List of Wild Terrestrial Animals with Key Ecological, Scientific and Social Values

**Author:** YANG Xiaohong, FENG Lu

## **Abstract:**

List of Wild Terrestrial Animals with Key Ecological, Scientific and Social Values that was released by the National Forestry and Grassland Administration needs timely adjustment and revision. It is important to be adapted to fit on a new situation of wild resource protection and maintain biodiversity and ecological balance. The article puts forward some suggestion for revision based on the authors' observation on dynamics of population change of wild animals, the threats they face and attention from the society.

**Key words:** List of Wild Terrestrial Animals with Key Ecological, Scientific and Social Values, calling for public suggestion, revision
