

# Suggestions on Technological Innovation and Future Development of Green, Low-carbon and Wisdom Industry

By CUI Dapeng

## Abstract:

With the great changes in international political, economic, military and epidemic situation, under the backdrop of promoting China's domestic double cycle and common prosperity, low carbon transformation should take stability as the priority. To achieve the carbon peaking and carbon neutrality goals, the development of green electricity and green hydrogen industry chain is important. Beijing, equipped with world-class international market, is innovation-driven and capable of original innovation. We will promote coordinated development of the Beijing-Tianjin-Hebei region. Beyond carbon neutrality, there is the digital economy, where everything is connected. All walks of life need to achieve wisdom industries.

**Key words:** technological innovation, green and low-carbon, wisdom industry, create a new situation
